## **ORGANIZATIONAL ANNOUNCEMENT**

July 21, 2021

I am pleased to announce that Hamsini Sundararaman has been appointed to the role of Assistant Program Lead with MDG Boston.

In this important role, she will collaborate with Dr. Geoff Moodie, Vice President of Programming in the creation and maintenance of MDG Boston events, continuing to ensure a positive and meaningful attendee and speaker experience in support of MDG Boston's commitment to the advancement and development of medical devices and technologies.

Ms. Sundararaman holds a Bachelor of Engineering in Electronics and Communication Engineering from Anna University, Chennai India and a Master of Science in Bioengineering with a specialization in Medical Devices and Bio-Imaging from Northeastern University, Boston Massachusetts.

During Ms. Sundararaman's career and educational pursuits, she led a number of significant academic projects focused on the heart and has held positions within the Engineering organizations of Neutron Therapeutics and Siemens Healthineers.

Please join me and the entire MDG board in welcoming Ms. Sundararaman to MDG Boston and wishing her continued success in building her career within the Medical Device and Medical technology industry.

Jeff Karg, President
